

## **Patient Engagement-Widening our Engagement 10/26/21**

**Lead Facilitator:** Kim Kimminau, PhD and Jeff Ordway

**9:10-9:55**

Focus on Call of Action – It is to walk the talk of engagement beyond what we are doing. We need to do more.

PCORnet has challenged us to expand our patient involvement and our view of stakeholders.

How do we begin to chart our course to engage additional stakeholders?

- We want to maintain and honor our engagement team as we develop it.
- Maintain our partnership model
- We have worked in a dyad model that we feel is unique and works well for us. The PEO works together to bring engagement into the local site activities and partner with a Patient Community Partner.
- We need to continue to do our Engagement/Partnership work. But we need to engage more stakeholders in a way that doesn't diminish the bonds that we have formed in the community.

Potential Challenges in bringing together diverse stakeholders. What does it look like?

- PCORI has not given us any guidelines or boundaries.
- What is our goal? Engage additional stakeholders, get them to the table to talk.
- How do we integrate the additional voices into our group?
- Would you consider having focus groups with these other stakeholders to get their input on the best way to be involved?
- Do it in phases starting with a meet and greet
